

ANIRUDHA DASGUPTA

FULL STACK DEVELOPER

San Francisco, CA | me.anirudhh@gmail.com | 630-460-8779

<https://github.com/Anirudhh777> | <https://www.linkedin.com/in/anirudhhdasgupta> | www.anirudhh.info

An accomplished developer in MEAN, RUBY & LAMP Stack, trained to build web apps from scratch. A keen learner with excellent communication skills & experience of working in a professional team environment.

Projects

Link Communicator: https://github.com/Links_Hackathon

- An open-source web application developed at an In-house Coding Dojo hackathon by a team of 5 in conjunction with Liberty in North Korea (LINK) organization to provide an online web platform to coordinate LINK's rescue teams spread throughout the world.
- Developed using *PHP on CodeIgniter MVC, MySQL, HighCharts (JS Library), jQuery & Bootstrap*.
- Responsible for implementing HighCharts, a JavaScript interactive charts library.
- Won the hackathon & application is currently being used by LINK.

Talknow: www.talknow.xyz

- Chat application, which allows registered users to message each other in different languages. Sent messages translate into any language selected by the end user.
- Developed using *Node.js, Express.js, MongoDB & AngularJS (MEAN Stack)*.
- Independent application, responsible for all aspects of the app.
- Deployed on Amazon EC2.

Work Experience

PalTech Web Solutions:

(2015-2016)

Front End Web Developer (Angular/Node) – San Francisco Bay Area

Responsible for User Interface development for Clients using the MEAN stack and Server side programming with Ruby on Rails. Worked with SQL & NOSQL Databases to meet client requirements. Test Driven Development using RSpec, Mocha, and Chai. Got experience in working with JS MVC frameworks like Ember & React.

Air India:

(2011-2014)

Worked as a Flight Attendant for the national Air carrier of India, deployed on International routes, flying on Boeing 777, 787 type Aircrafts.

Education

Coding Dojo:

(2015)

14 week coding bootcamp in San Jose, CA. Learned three different full technology stacks: LAMP, MEAN & Ruby on Rails. Took belt exams at the end of each stack, passing every exam on the first attempt, and achieving the coveted double black belt. Participated in multiple in-house hackathons, winning the first one. Participated in a total of 3 hackathons.

Bachelors Of Management:

(2006-2010)

A full time 3-year Bachelors degree from Mumbai University, with specialization in marketing & quantitative methods of business.
